PRODUCT DESIGN MANAGER

Paton.dev

Role Summary

Led end to end product design and research for Bublibu a food commerce platform serving both sellers and buyers. Owned UX strategy, design execution, and cross-functional alignment across product, business, and engineering teams

Key Responsibilities

- **Led product discovery and UX strategy**, conducting qualitative and quantitative research including competitive analysis, stakeholder interviews, and market positioning.
- **Translate business process into tangible ui/ux design**, breaking high level workflow into visual, user-centric interactions. this done by mapping user flow wireframing interface and defining UI components.
- **Improving product performance** by set goals and monitoring actionable KPI.
- **Managing graphic design and frontend team** to achieve desired UI outcome.
- **Built and scaled a design system** to improve consistency, branding and user experience.
- **Conducted usability testing** and focus group discussions (FGD) with early customers to validate and refine solutions.
- **Merchant canvassing** with Community manager.

Notable impact

- Led and managed the delivery of the Bublibu super app with seller and buyer apps with a 4-person team.
- Improve delivery performance by optimizing courier order message (UX)

[Profesional Experience]

Jul 2018 - Aug 2019

SENIOR DESIGN CONSULTANT IBM Indonesia

Role Summary

Provided enterprise UX and design consulting for digital transformation programs across telecommunications and financial services clients.

Key Responsibilities

- **UX and UI design audits** on existing enterprise products to identify usability gaps and design inconsistencies.
- **Conducted heuristic evaluations** (Nielsen Norman) and usability assessments to improve experience quality.
- **Established design organization** structures and DesignOps practices for client teams.
- **Supported the creation and scaling of enterprise design systems**, including governance, documentation, and handover.
- **Facilitated stakeholder alignment sessions** with product managers and business leaders to drive design adoption.

Notable impact

- Delivered a new design system for XL Axiata, improving visual consistency and team alignment across multiple product squads.

[Profesional Experience]

May 2017 - Jun 2018

SENIOR UI/UX DESIGNER

Moka POS

Role Summary

Design high fidelity production ready UI design assets for moka product development team, working with product managers translate business process into tangible ui/ux design and field research on merchant store to gather insight for improving MOKA user experience.

Key Responsibilities

- **Translate business process into tangible ui/ux design**, breaking high level workflow into visual, user-centric interactions. this done by mapping user flow wireframing interface and defining UI components.
- **Improving product performance** by set goals and monitoring actionable KPI and field research.
- **Directing graphic design and frontend team** to achieve desired UI outcome.
- **Conducted usability testing** with Moka Pos merchant to gather insight and improvement.

Notable impact

- **Successfully refactoring Moka POS receipt** design architecture, assuring Moka receipt adoptable to many business cases such as FnB and Retail merchant. while newly designed receipt reduced receipt paper consumption by 15% across thousands of merchants, delivering both cost savings and environmental impact.
